

UNIVERSITY COLLEGE OF ENGINEERING NARASARAOPET

IEEE STUDENT BRANCH (#STB11430)

DATE: 16/02/2019

SUB: Technical talk on Basics of Artificial Intelligence Meeting

The first technical event was conducted under the student branch on 08-02-2019. The lecture delivered by Prof.E.S.Reddy Garu was common to students of all engineering disciplines. The session dealt with the necessity of Artificial Intelligence and its relevance in the different engineering domains and also in daily life. The attendees learnt interesting applications of AI like Face Recognition, Handwriting recognition, Robots for lawn mowing, cleaning and driverless cars, etc., Sir has made us understand that Systems that Think and Act like humans are artificial intelligent systems. The session went on for 2 hours, from 2:00 PM to 3:00 PM. The session made it evident that AI is not confined to Computer Science background and aroused interest in many students form other backgrounds as well.
